

# CPU/Monitor Kit

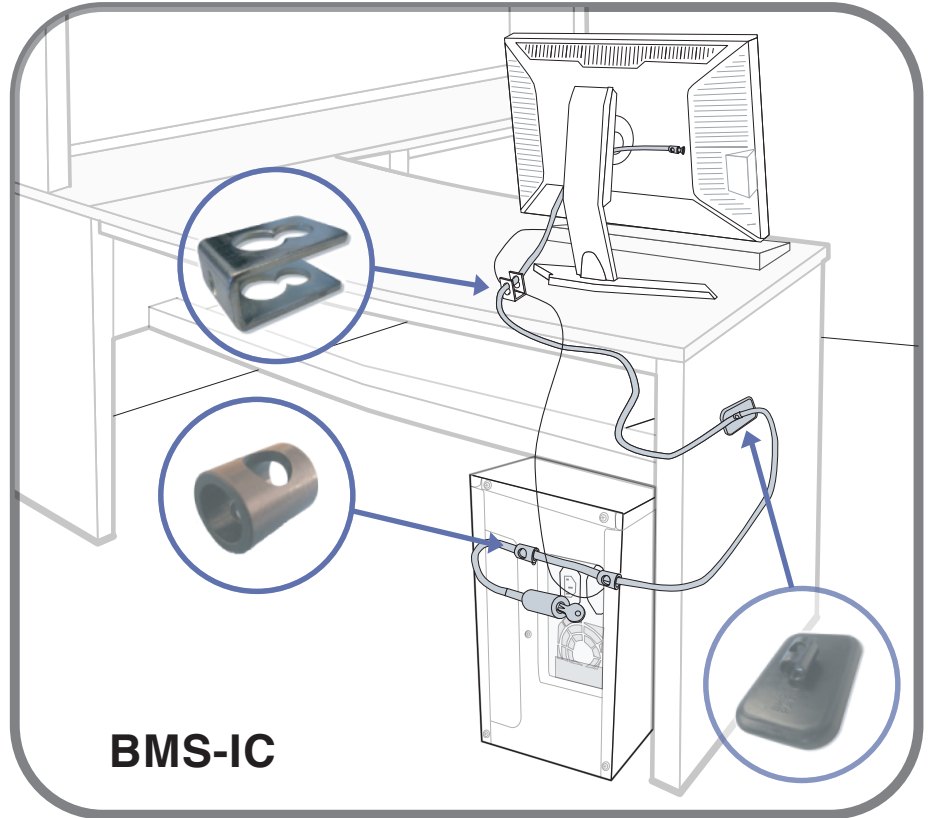

If you can't afford to replace it...Lock It Down!

User Friendly

Practical

**BMS Cable Loc Kits** are used to secure and deter theft of all types of computers, monitors, printers, fax machines, multimedia projectors, and other school and office equipment.

**Mouse Trap**

A 'U' shaped metal device designed to entrap a mouse, keyboard, and/or other data cable. Used in conjunction with a BMS Security Cable.

**Cable Nut**

Metal tube attaches to an exposed case screw which protects internal components. Can also be used as an anchor for a BMS Security Cable.

**Flex Pads**

A Cable Nut attached to a steel disk completely encased in flexible neoprene. This will permanently bond to a flat OR curved surface.
